

If you have any questions about the list of recyclable and non-recyclable materials below, please call Customer Service.

Types 3-7 Plastics are no longer recyclable. There is no market for this material, so if it ends up in the recycling, it will be trucked to the recycling plant, then sorted and trucked to the landfill. The best way to reduce the carbon footprint of each item is to follow these guidelines closely and be sure to reach out to our Customer Service if you have any questions!

The two types of plastic that are still recyclable are **Types 1 & 2**, which are among the most common. Examples of Type 1 include soda, water, salad dressing and cooking oil bottles (either bottles you drink from, or that hold consumables). Some examples of Type 2 include milk and juice jugs, shampoo, conditioner or bodywash bottles and laundry detergents containers. Neither of these lists are comprehensive, so be sure to check each container for the recycling logo and the codes PET or PETE for Type 1 and PEHD or HDPE for Type 2. If the container has any of these codes, it is recyclable. If it does not, then it is not recyclable.

RECYCLABLE MATERIALS

- Aluminum Cans
- Corrugated Cardboard
- Newsprint and Inserts
- Office Paper
- Type 1 & 2 Plastics
- Steel Cans
- Glass bottles and jars
